Diago [Last name]

Junior Full-Stack Developer (React · Python · Django)

Havana, Cuba · genthimdev@gmail.com · github.com/GenthimDeV

Summary

Final-year Computer Science student and part-time developer with a frontend background who learned backend by building production software. I designed, built and deployed on my own a full-stack corporate intranet that has been running in production since September 2026 and keeps growing with new features. I work with AI coding agents and review, test and understand what they produce.

Experience

Software Developer (part-time) — Aguas de La Habana, Havana, Cuba

April 2026 – present

Sole developer of the company's internal intranet (Django). In production since September 2026 and under continuous development.

- Role-based access control with four roles: user, editor, administrator and director.
- Publishing of news and informational notes by editors, with a notification dropdown and per-user unread counter.
- Administrator audit log recording user, action, IP address and exact time, with calendar filters and Excel export (filtered or full).
- Monthly Excel import that adds or updates directory data (extensions, direct lines, mobile lines, staff, positions and areas) through an automated script.
- Dashboards: spending per extension, line and area for directors, and publication metrics by week, month and half-year.
- Application launcher that counts clicks per app to show the most used ones, with up to three pinned favorites; company image gallery.
- Keep the system running and ship new features as the company requests them.

Education

University of Informatics Sciences (UCI) — Engineering in Computer Sciences (Ingeniería en Ciencias Informáticas), Havana, Cuba *2024 – expected 2027 (final year)*

Skills

- **Backend and databases:** Python, Django, PostgreSQL (university coursework)
- **Frontend:** HTML, CSS, JavaScript, React, Tailwind CSS
- **Ways of working:** Git and GitHub (basic); AI-assisted development (Claude, Cursor, GitHub Copilot) with code review and testing
- **Currently learning:** TypeScript, Astro

Languages

- Spanish — native
- English — B1 (intermediate)
